PROJECTS

1. **https://coinfomo.cc/**
I have created this cypto currency promoting website in Codeigniter. I implemented Coingecko API to calculate market prices and various info of crypto coins. I used jquery, ajax and staysafu api for getting the liquidity of coins.

2. **https://cryptohunters.digital/**
Crypto currency promotion project completed by me by using Ajax, Codeigniter, JQuery and Google Recaptcha V2.

3. https://coindiscovery.app/
This site is for promoting crypto currency and promoting coins. This website has been developed by me in Codeigniter, Ajax, Jquery, Google Recaptcha V2, Google login library, and the database configuration is AWS.

4. https://blablanimal.com/
The programming language is used here is Php (Codeigniter), Jquery, and for frontend HTML and responsive CSS. I implemented google direction API and Google Map API here. The payment gateway used by me here is PayPal. The language is by default Spanish and has multi-language capability.

5. https://riseestatemarbella.com/all-properties/
Created custom functionalities in Word Press where data are displayed via XML API and searching functionality is running with the help of WP-Ajax.

6. https://test-dallmayr.schuimer.net/
This is a web application that recommends wines to the consumer in Germany. The whole functionality is on twig framework. The client application communicates with our server via a simple API and I Implemented JQuery, Web share API and CSS.

7. https://www.youth-revisited.co.uk/
This was assigned to in the re-development phase; I rearranged all functionalities on client demand. The technology used here is mostly Core PHP and AJAX.

8. https://autoscash.co.uk/
Custom Ajax functionalities have been done in Word Press for evaluating car data by uk1.ukvehicledata.co.uk/api/.

9. https://www.umbrellatransfers.com/
Airport Transfers, Minicab Professional Service in London. The technologies used by me here are Codeigniter, JQuery, and Ajax.
